Billing terms

- **Do I pay while I practise?** No. Practice is free. You pay from the day you go Live.
- **How does yearly billing work?** You pay for 10 months and get 12. The price stays the same for the whole year.
- **Can I change my package later?** Yes. A bigger package starts at once, and you pay only for the days left. A smaller package starts at the end of your period, when your team and outlets fit it.
- **Can I change my business modules?** Yes. You can swap one module for another once a month for free. A module you turn off keeps its data.
- **What if I go over my package?** We tell you in the app and by email. After 14 days you cannot add more of that kind until you buy more. Selling always goes on.
- **What if I pay late?** We send reminders first. From day 8 the business is read-only, until you pay. Paying opens it again at once.
- **Will my price change?** Yearly prices are fixed for the year. We tell you 60 days before a monthly price changes.
- **How can I pay?** You get an invoice in your Sylloo account and can pay it there. Yearly and Enterprise invoices can also be paid by bank transfer.

Prices are in US dollars and do not include tax. Tax depends on your billing country.
